PROJECTS

PORTFOLIO | React, Tailwind CSS
- Developed a mobile-first personal portfolio using reusable React components, improving maintainability and scalability.
- Implemented responsive UI with Tailwind CSS, ensuring consistent design across devices and optimized load performance.

COCKTAILS APP | React, Tailwind CSS, GSAP
- Built and deployed an interactive cocktails web app with modular React architecture and optimized rendering performance.
- Integrated GSAP animations to enhance user engagement and create smooth, high-performance UI transitions.

CRUD APP | Node, Express, MongoDB
- Developed a full-stack CRUD application with RESTful APIs for efficient data handling and database operations.
- Structured backend with scalable architecture, enabling clean data flow between client and server.

AUTHENTICATION SYSTEM | React, Node, Express, MongoDB
- Designed and implemented secure authentication APIs for user registration and login with encrypted password storage (JWT-based auth).
- Applied middleware-based route protection to secure private endpoints and improve overall application security.

3D Model | React, React Three Fiber, Three.js
- Built an interactive 3D web experience using React Three Fiber and Three.js for rendering dynamic models.
- Optimized rendering performance and user interaction for smooth real-time visualization.

SNAKE GAME | HTML, CSS, JS
- Developed a browser-based Snake Game with custom game logic, collision detection, and restart functionality.
- Demonstrated strong JavaScript fundamentals through efficient DOM manipulation and smooth animations.
